

**#71229**

Interruptor incorporável

Interruptor incorporado para controlar sem fios dispositivos/luzes ou com o(s) interruptor(es) de parede existente(s)

Características principais

- Controla sem fios qualquer dispositivo ou luz até 2300 Watts
- Design compacto: pode ser facilmente instalado numa caixa de teto ou derivação
- Funciona com comandos remotos, interruptores de parede, sensores ou ICS-2000 (aplicação) da linha Trust Smart Home Start Line
- Poupa energia: as luzes ou dispositivos desligam-se automaticamente ao fim de 1,10 minutos ou de 1 ou 4 horas
- Liga até 2 interruptores de parede existentes, como, por exemplo, no cimo e no fundo de uma escada
- O(s) interruptor(es) de parede existente(s) continua(m) a funcionar

O que está na caixa

- Interruptor incorporável
- Manual

Requisitos de sistema

- Transmissor Trust Smart Home (Start line)

Wirelessly control any light/device up to 2300 Watt

With this ACM-2300-HC built-in switch, you can wirelessly switch your lights and other devices. Install it in a standard ceiling box and it allows you to wirelessly switch connected lights or other devices up to 2300 Watt. Use your existing wall switch and/or combine this switch with one of the Trust Smart Home transmitters for easy control.

Compact design

The existing wall switches remain operational: these can be connected to this switch. Thanks to its compact design, it can easily be installed in a ceiling or junction box. You can even connect up to two existing wall switches, for example at the top and bottom of the stairs.

Automatic control

This built-in switch now also has the option of automatically switching off lights or devices thanks to the automatic timer function. For example, you can automatically switch off a fan after 1 or 10 minutes or after 1 or 4 hours. Ideal for a carefree and energy efficient operation of your home!

Wireless control

You can control this built-in switch with any Trust Smart Home transmitter with the automatic code system, such as the AYCT-102 remote control. You can now experience the comfort of wireless switching throughout your home! Or even want to go further? Connect the built-in switch to your free Trust Smart Home app with the help of the ICS-2000 control station and you can control your lights wherever you are.

GERAL

Application	Indoor	Height of main product (in mm)	45 mm
Width of main product (in mm)	40 mm	Depth of main product (in mm)	15.2 mm
Total weight	30 g	Weight of main unit	30 g

POWER OUTPUT

Number of power output channels 1

33

Code system	Automatic	Start Line Product type	Receiver
--------------------	-----------	--------------------------------	----------

BUILD-IN

Intended installation	Build-in	Number of traditional wall switches supported	2
Possible to connect traditional wall socket	False	Possible to connect traditional wall switch	True
Required electrical power wires	220V, Null	Supports stairwell circuit	True

RECEIVER

Max number of transmitters supported 32

OUTPUT

Power output	True	Output voltage	230
Max Output power - per channel	2300W	Max power per supported lamp/device type	2300W
Total max output power (W)	2300 Watt		

ELECTRONIC

Standby power	1 W	Input frequency of main device	50 Hz
----------------------	-----	---------------------------------------	-------

COMPATIBILITY

Compatible Product Lines Start Line

CONNECTIVITY

Wireless range 50 m
