

CAT05 FR

Solar Light Tube + LEDin

Solar Light Tube + Light Integral Controller

Maximum lighting efficiency

What are solar tubes?

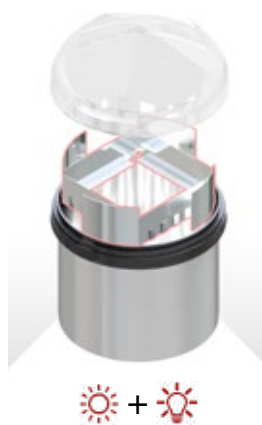

Eco-friendly systems where natural light is captured. It is guided through a tube lined internally with an extremely reflective material, which minimizes light scatter and allows light to be delivered to considerable distances without heat transmission or cold.

What is LEDin?

It is the integration of LED lighting in solar tubes, which allows efficient lighting 24 hours a day. During the day and on sunny days, the lighting of the space comes from the sun. As night approaches or the darkness of day approaches, Chatron's "Light Controller" console powers the LEDs to maintain the desired lux level selected at that location constant.

Factory: Travessa da Zona Industrial - 1, nº 95 Rossio, 3730-601 Vila Cova do Perrinho, Vale de Cambra, PORTUGAL
