

Environment Policy

ERT is committed in implement all the strategies and opportunities to minimize its impact on the environment as an industry and environmental friendly companny. Those strategies are based in the conscious use of natural resources, resource's usage monitoring and mitigation of the use of its raw materials by maximizing the efficiency of their processes.

The main values are:

- Ensure compliance with legal requirements as well as other requirements that the organization assumes as differentiators;
- Control significant environmental aspects that contribute to pollution prevention;
- Decrease the potential impact of our activities, products and services on the environment in order to prevent pollution practics;
- Waste management and preservation of natural resources;
- Sensibilization and accountability of employees for continuous improvement in their daily activities;
- Environment protection, encouraging the engagement and participation of the employees in formation-based activities.

ERT commits to evaluate and review the effectiveness of the environmental management system and policy whenever necessary.
