

Biomechanical Quality Certificate

UMANA
Biomechanical Analysis Centre

CERTIFIES
that the shoes

Jamor

developed and marketed by

Lavoro

provides a

very good
ergodesign

for the health and comfort of users regarding the parameters described in the technical annex.

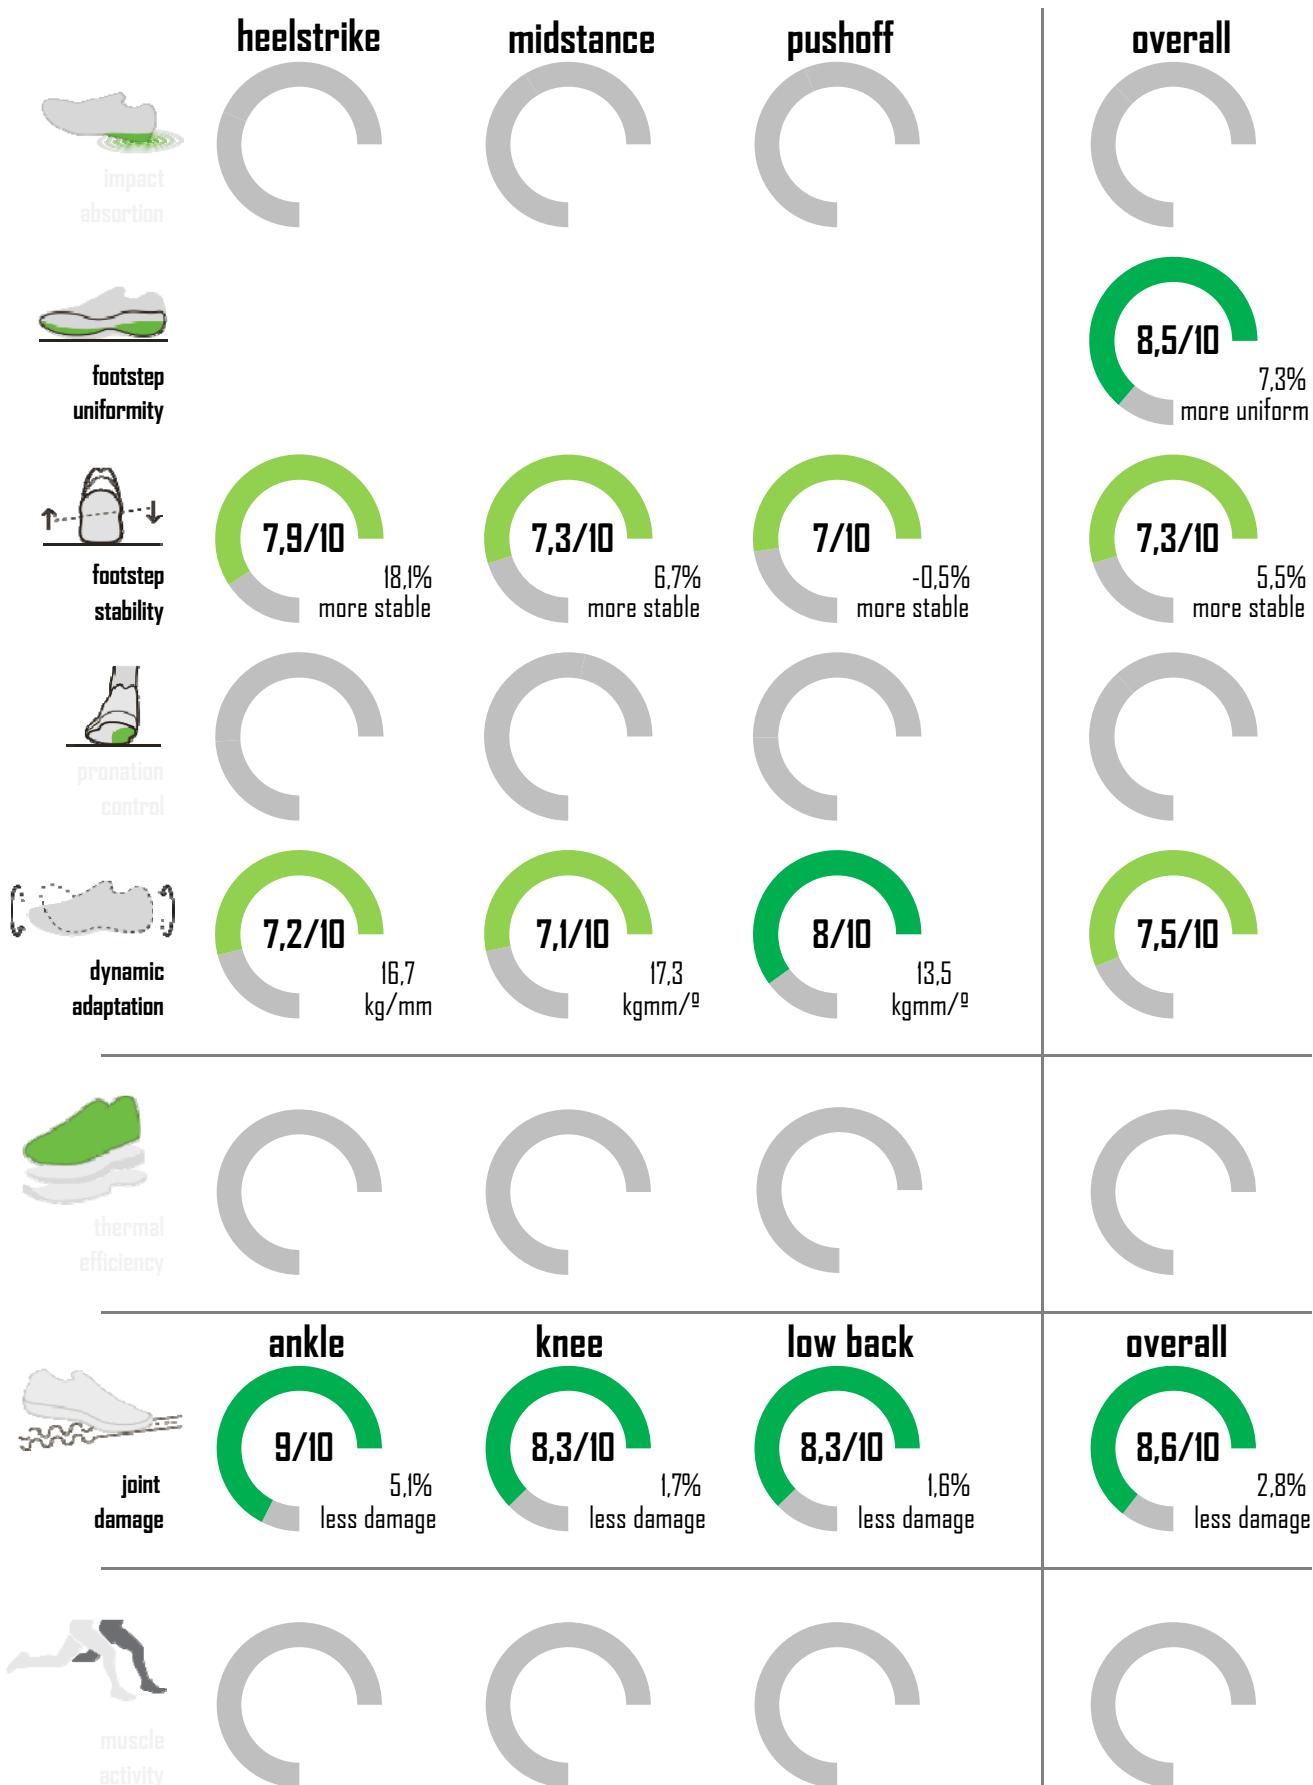

UMANA guarantees the accuracy and objectivity of the biomechanical tests, which have been carried out under strict study protocols and which allow obtaining values for the analytical parameters in a direct, instrumental manner without human intervention.

Technical Annex (a detailed evaluation for each biomechanical parameter)

This study was carried out using the average value for 5 people (5 men and 0 women), whose physical characteristics fall within the following ranges:

Foot type diverse Height 169 - 194 cm P 22,5 - 99,9
 Footstep pattern diverse Weight 67 - 89 kg IMC 19,3 - 28
 which gives an estimated confidence level of 80% and an error margin of 10%

overall
evaluation

Very good
