

The background of the entire page is a dynamic, flowing blue fabric that creates a sense of movement and softness. The fabric is layered, with some parts appearing more translucent than others, and it curves and folds across the frame. The color transitions from a light, airy blue at the top to a deeper, more saturated blue towards the bottom.

Medical Wear®

Disposable Medical Devices

Comfort and Safety

MedicalWear®

In all our products, we focus on safety and efficacy on one hand, and on the other hand, the need to adapt the characteristics of the materials to the specificity of each surgery.

Oasipor - MedicalWear® makes available to the health professionals several product lines that meet their needs, valuing above all safety, quality and comfort in the development of their products. Our surgical drapes and gowns comply with the requirements of the European standard EN 13795, thus ensuring adequate infection control in an operating room environment.

Oasipor - MedicalWear® products meet the most demanding requirements with regard to the choice of materials and design, without forgetting the comfort of professionals and patients or the importance of reducing the cost of surgical procedures.

In order to achieve high levels of standards and effectiveness, our products clearly distinguish between the critical and non-critical areas, taking into consideration the surgical times and incorporating new evolutionary trends in the production of surgical cover material.

In this way, the **MedicalWear®** product line aims at ensuring: safe and effective coverage of the patient and their surroundings, using materials that minimise risk factors for infection while meeting demanding levels of environmental protection.

Our motto focuses on the continuous improvement, creation and development of our products, diversifying them and adapting them to the specific procedures required by the various medical and surgical acts, thus contributing to improve and facilitate the work carried out by Health Professionals in the operating room area.

MedicalWear® **s-POD**
SURGICAL PACKS ON DEMAND

The **s-POD** concept developed by **MedicalWear®** allows you to produce a pack with the components you need in any specific surgical act.

Develop your package, choose your components and features, send us the specs by email at geral@oasipor.pt and we will be happy to provide quotes and delivery times for your **s-POD MedicalWear®**.
