Reasons to feel welcome

Joining the SPAVC Conference is a good choice because it involves...
...A pathology that deserves the greatest attention from the World Scientific Community, as it is worried about the predictions associated with population ageing...
...Addressing that pathology with a programme that shows that stroke is a link of the chain that is the cerebrovascular disease...
...Demanding a multidisciplinary contribution for approaching the several selected subjects associated with that pathology...
...National and Foreign Health Professionals that guarantee high scientific quality...
    ...Appealing:
    - everyone to participate and contribute with works either as oral communications or posters
    - thus contributing with a great step for the fight against a *predictable* Catastrophe that is *treatable*
