

MANNOL Power Steering Fluid 8970

Special synthetic fluid (contains PAO) for HONDA and ACURA power steering systems developed in accordance with HONDA standards.

Product properties:

- Can be used all year round, even in frigid environments due to very low pour point (-40°C and below), while maintaining excellent starting properties, and high temperature (the upper limit of the working temperature is $+100^{\circ}\text{C}$);
- Maintains stable viscosity and fluidity even at low temperatures due to stable and high viscosity index;
- Compatible with all kinds of hoses and sealants, and actively prevents leakage;
- Maintains optimal viscosity high loads due to excellent shear stability;
- Very high chemical, thermal and antioxidant stability contributes to increased engine life and increases resistance to foaming;
- Excellent lubricating demulsifying properties;
- Actively protects against corrosion and wear;
- Reduces the noise of the pump and ensures smooth operation of the steering wheel and comfort while driving.
